## **DETAILED ACTION**

### ***Response to Amendment***

The amendment filed 11-06-2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

Applicant states that "the claim amendment are supported in the drawings, for example Figs. 23A-F (formerly Fig.1-M).

It is unclear how this is possible when the specification does not contain figures 23A-F, but figures 23, 23A and 23B which are drawn to maintenance of a user profile, displaying an item, customizing the presentation, allowing the user to select the item for purchase and collecting user information, figure 1M is a display labeled "Web Architecture Framework Today's Environment" that is briefly referred to on the pages 19-22 as a tool for visually comparing the offerings of two vendors, but is not fully enabled by the paragraph pointed out by applicant on page 20.

Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which

Art Unit: 3629

was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. see above regarding new matter and the specification.
